🌐 Sinan Kasikci

📄 Summary

Computer and Software Engineering student focused on developing expertise in network technologies, algorithms, and system performance. Working with C and Python on data structures, low-level logic, and optimization, with analytical thinking and problem solving as key strengths. Motivated by learning new technologies, applying them through projects, and building scalable, efficient solutions.

📁 Projects & Achievements

2023 – Present

Algorithmic & Systems Projects

- Developed algorithm-focused projects using C and Python
- Implemented data structures and performance-oriented solutions
- Worked on low-level programming concepts, debugging and optimization

🎓 Education

09/2025 – Present

42 Warsaw

- Algorithms
- Unix Systems
- Low-Level Programming
- Python & C

09/2023 – Present

Vistula University

BSc Computer and Software Engineering

Focus: Network Technologies, Software Development

🧠 Skills

Technical

- C, C++, Python, JavaScript
- React
- Linux, Bash
- Git, GitHub, VS Code

Core Competencies

- Data Structures & Algorithms
- Problem Solving
- Performance Optimization
- Networking Fundamentals

🌐 Languages

Turkish

English

Polish

🏆 Achievements

- 2nd Place — Codaro Google Startup Hackathon
- Student at 42 Warsaw
